EDUCATION

Full Stack Development Program

Ironhack

December 2020

Bachelor of Arts

Emerson College

Graduated: May 2016

WORK EXPERIENCE

Surfside

Integrations Engineer   April 2024 - Present

- Developer on Node.JS SDK related projects, building out complex data pipelines that funnel through LLM systems.
- Team lead, building out Agile based systems and facilitating team members.

STOVA

Software Engineer   April 2023 - March 2024

- Developer on an agile team building Vue (Nuxt.JS) based multi tenant web applications for large scale events.
- Translating business needs and research informed designs into modern user interfaces within client deadlines using Tailwind CSS.
- Leading discovery into new technologies and libraries for UI development.
- Developed real time dashboards for user analytics and utilized libraries such as Chart.js to give event attendees visual feedback on event participation.
- Architecting client user interfaces using Vue 3 composition API standards and TypeScript.
- Utilizing and maintaining component libraries using stencil.js.
- Improved application performance by translating Vue 2 deprecated applications to a Nuxt Vue 3 environment.
- Built instant messaging services and email automations utilizing web hooks to allow easy communication between event administrators and participants.
- Built serverless backends using AWS Lambda and the Serverless framework
- Building custom API integrations for clients, outside agencies, and large events
- Key architect behind Serverless backend builds and high level Model View Controller design patterns.

Superfly

Senior Fullstack Developer   September 2022 - March 2023

Frontend Developer   April 2021 - September 2022

- Lead developer of single page applications for festivals such as Outside Lands and The Friends Experience.
- Created and managed Typescript based React (Next.Js, Tailwind.css) and Vue(Nuxt, Bootstrap) apps.
- Utilized SalesForce CRM, posting all customer data to the Salesforce API
- Designed and managed application deployment pipelines for high availability and redundancy using AWS, Netlify, and Heroku
- Created web sites based on Figma and Adobe XD prototypes.
- Worked with designers on bringing prototypes to life.
- Managed hiring of developers for various projects.
- Managed serverless Node.JS and Python back end functions and REST APIs using AWS Lambda.
- Created robust headless(Netlify, Siteleaf) and decoupled(Strapi) CMS to allow codeless changes to various applications.
- Managed server based back end applications using Node.JS
- Assembled robust back end databases using Python and JavaScript frameworks such as Django and Nest.JS
- Managed DynamoDB and MongoDB databases.

ADDITIONAL WORK EXPERIENCE

Freelance
Software Engineer   December 2016 - Present

- Worked in Next.JS front end, using Tailwind CSS and Web3.JS to create a Web3 application that sold out upon minting.
- Development consultant for various startups and agencies including a senior web development role for a leading pharmaceutical company.
- Worked in CSS animation, React, and Gatsby to deliver robust static web-applications for pharmaceutical marketing.
- Worked with REST APIs in GraphQL to pull data from Pharmaceutical databases to build data driven static web applications.
- Integrated TypeScript and established avenues to load React Applications into CMS apps such as WordPress or SquareSpace.
- Worked hand and hand with UX designer to translate Figma prototypes for a large Warner Brothers eccomerce product.

Byte New York
Creative Technologist   May 2018 - October 2020

- Designed and engineered large batch video automation technologies using JavaScript frameworks.
- Created systems that bridged the gap between After Effects animation and HTML data.
- Created complex HTML banner ad SVG Animations for DCM and AdWords.
- Programmed HTML creative for clients such as Google and Spotify.
- Developed data driven graphics using JavaScript and HTML5.
- Developed automated templates within After Effects for regular releases through Spotify.

Townsquare Media
Video Editor and Shooter   June 2017 - May 2018

- Lead producer for Loudwire.com and XXL.

LoveLive
Post Production Coordinator   July 2016 - December 2016

- Oversaw workflow of production, constructed and maintained channels for server uploads and backups, and regularly transcoded camera data

Luaka Bop
Intern   June 2015 - June 2016

- Provided production, post-production, and graphic design assistance for a renowned indie music label founded by David Byrne of the Talking Heads.
